

How to clean your devices

- Germs can stick to electronic devices
- Keeping our devices clean is as important as keeping ourselves clean

Always

1. Clean your hands
2. Use hands free if you can

Never

1. Use water near ports
2. Use kitchen sponges
3. Use bleach

Keyboard and Mouse

Step 1: Use a damp cotton bud and sweep between the keys

Step 2: Use a Hoover to remove any food and dust

Step 3: Use an alcohol wipe all over

Games Controllers

Step 1: Turn off and remove any batteries

Step 2: Use an alcohol wipe all over

Mobile Phones

Step 1: Turn off and unplug

Step 2: Use an alcohol wipe on the screen

Step 3: Use soap and water on the case

Laptops and Computers

Step 1: Turn off device and unplug

Step 2: Wipe the screen with a microfiber cloth to remove dust

Step 3: Use an alcohol wipe all over the rest
